Trial**Description**

No

Intuitive to use and manage, delivers telepresence experiences to standard meeting rooms, conference rooms, and other environments requiring simple connectivity. Can be mounted on a roll-about stand for room portability. Hardware assisted CODEC, reducing bandwidth by up to 50%. HDMI output allows for quick and seamless integration with high definition displays via a single cable, while powerful standards-based technology allows users to easily and quickly share high-quality documents and multimedia content. Home theatre quality audio experiences are delivered giving users unrivalled acoustic clarity.

Features

High-definition video and audio conferencing

1 x external monitor

Standards-base H.264 High Profile technology

Stand alone (no computer required)

Camera PTZ capabilities (optional models)

Screen sharing via externally connected device e.g. computer, DVD Player

Secure 197-bit AES encryption

Hardware assisted compression (up to 50% less bandwidth)

Hardware assisted error correction (more reliable video and audio)

Integrated solutions with partners such as Microsoft, HP, IBM, BroadSoft

Able to communicate with any other Polycom products

People+Content IP software integration

Limitations

Proprietary hardware configuration

Firewall configuration often required

Not able to send files and documents

Compatibility

Due to the system being hardware assisted, it will enable almost any device that has DVI/VGA output to be directly connected for screen sharing, e.g. Computer, laptop, or DVD player. Additionally People+Content IP software can be installed on computers within the intranet the HDX 6000 is connected and allow screen sharing from that computer.
